

SUMMARY

I am a final-year Computer Science Engineering student at Bhagwant Institute of Technology, Barshi, graduating in June 2026. Currently, I am gaining experience as a Java Full Stack Developer Intern at Technoworld Softwares, Pune, where I focus on building and maintaining software applications. I have a strong foundation in web development, having built projects like a YouTube clone using React.js and RapidAPI to create interactive user interfaces. I am dedicated to continuous learning and improving my technical skills through practical, hands-on work.

EDUCATION

JSPM’S Bhagwant Institute of Technology	Barshi, Solapur
Bachelor of Technology in Computer Science and Engineering	2026 SGPA: 7.0
Shri Shivaji Mahavidyalaya, Barshi	Barshi, Solapur
12th	2022 57.17%
Adarsh High School, Shendri	Shendri, Barshi
10th	2020 87.60

TRAINING & EXPERIANCE

Java Full Stack Developer Technoworld Softwares,	Pune Feb 2026 – Present
- Undergoing an Internship Program focused on Java Full Stack Development. - Gaining hands-on experience and practical knowledge by building software applications. - Learning to follow industry coding standards and company best practices. - Gaining hands-on experience by building and maintaining software applications. - Exploring new technologies and implementing them to improve software functionality. - Developing technical skills by following industry-standard coding practices.	

SKILLS SUMMARY

- Languages:** HTML, CSS, JavaScript, Java
- Frontend:** React.js, Bootstrap
- Backend:** Spring boot, Hibernate
- Database:** MySQL
- Tools:** GitHub, Postman, VS Code

PROJECTS

YouTube Clone:
- Created a high-quality video streaming frontend using React.js to replicate the core YouTube user experience. - Integrated features like video search, category filtering, and a fully responsive layout for all device sizes. - Managed dynamic data rendering to ensure a smooth and interactive interface for users. - Showcased proficiency in modern JavaScript and component-based architecture.
Tech Stack: React.js, Material UI, YouTube Data API (via RapidAPI)
GitHub: https://github.com/jagjeet-nimbalkar/youtube-clone.git

Portfolio Website:
- Created a personal website to show my skills and projects in one place. - Built the site using React.js to make it fast and work well on both mobile and computers. - Added an AI Chatbot that can answer questions about my background and skills. - Used Email.js so that people can send me messages directly from the website. - Put the website online using Netlify for easy access.
Tech Stack: React.js, Email.js, JavaScript,

CERTIFICATION

MERN Stack Development – *Apna College*

Gained hands-on skills in MongoDB, Express.js, React, and Node.js by building real-world projects.

Generative AI Workshop- *NxtWave*

Completed a hands-on project in the 'AI for Students: Build Your Own Generative AI Model' workshop by **NxtWave**

ACHIVEMENT / EXTRACARRICULAR ACTIVITY

Participated in Web Development Tech Event organized by WIT Solapur (2024) Worked on a team project to build and design a responsive website, improving teamwork, coding, and problem-solving skills.
